National Innovation Diploma in Computer Software Engineering

Projects

Invoice App

A Full stack Invoice Application crafted using Vuejs (vuex) & Firebase. It keep track records of all invoices that is created. It Features include Create, Edit, Delete, Mark as Paid/Pending and also you can print the invoice. I Learned how to use the Vuex effective, how firebase cloud data work efficiently and how to handle promises, fetch/axios data from a 3rd party API, and I make use of limited NPM packages. You can check it and see how it works and it is open for everyone to see and feel the environment on the application.

Diceflix

Diceflix is movie search engine. I called it Diceflix because the name inspiration comes from Netflix. This project was built with React.js and with the help of OMDb API. You search any movie of your choices and it will display the movie image, year, title and date possibly.

Screenshot App

Web app built with Vue, Node.js, and Express & puppeteer for taking screenshot of any website and it will store to view the url of the screenshot taken.

Interests

Music, swimming, traveling, Playing car race, reading and hiking
